

## ORTHOPTERA ON LUNDY

By F. R. MARSHALL

*Leptophyes punctatissima* (Bosc.). 1 male on bramble south side of Millcombe 8th Aug. 1969.

1 female on Fuchsia behind Millcombe House. 12th Aug. 1969.

*Chorthippus brunneus* (Thunberg). Variety "green"—14% of total population on first siding north of Old Light. 12% of total population beside landing beach path.

Variety "green" listed by Ragge 1965 as extremely rare. More work relating vegetation with colour varieties could prove well worthwhile.
